

Steve Jobs' 2005 Stanford Commencement Address | Part 06

Texto para mineração e treinamento:

My second story is about love and loss. I was lucky. I found what I loved to do early in life. Woz and I started Apple in my parents' garage when I was 20. We worked hard, and in 10 years Apple had grown from just the two of us in a garage into a \$2 billion company with over 4000 employees. We'd just released our finest creation, the Macintosh, a year earlier, and I had just turned 30. And then I **got fired**. How can you **get fired** from a company you started? Well, as Apple grew we hired someone who I thought was very talented to run the company with me, and for the first years or so things went well. But then our visions of the future began to diverge and eventually we had a **falling out**. When we did, our Board of Directors sided with him. And so at 30 I was out. And very publicly out. What had been the focus of my entire adult life was gone, and it was devastating.
